tabletop Soon Nyarlathotep's plans will come to fruition. Then the world will be changed irrevocably -- but not quite yet. Pesky human investigators have learned much. Now they must survive long enough to make sense of what they know, and take resolute action. Masks of Nyarlathotep is a Lovecraftian exercise in horror and mystery. This Call of Cthulhu roleplaying classic is a series of linked adventures forming one long and unforgettable campaign. Horrifying deeds and dangerous sorcery dog those who dare attempt to unravel the fate of the Carlyle Expedition. Set in 1925, adventures begin in New York, then move overseas to England, Egypt, Kenya Colony, Shanghai, and western Australia. Such extended globetrotting requires wit and planning by the players. Their investigators must have steady finances, good language skills, and a willingness to persevere despite governmental interference and cultist harassment. Meanwhile the keeper must bring to life different exotic locales, recreate the sensibilities of other cultures, and balance non-player-character foes and friends to allow each investigator to earn his or her own destiny--ultimate triumph, perhaps, or perhaps madness and agonizing death. Estigma is a difficult-to-play, difficult-to-master puzzle that scares the crap out of you with a twisted nightmare of a game. It's a body horror experience that uses new mechanics to shake the competitive and puzzle genres alike. It's a hell of a ride and you'll never be the same after playing it! In the morning after you've been sleeping, your first and only sensation is your wet chest, the cold, hard floor a

muffled footstep, your unkempt hair a touch of mildew. You search your body with your hands and your eyes. There is nothing there to comfort you; they're all gone. You're a corpse. The person you once were, the last glimmer of your identity, has all but evaporated. A whisper brushes across your lips. It's not your own voice. "There you are", he says. "You're awake." "How are you feeling?", the voice asks. You stare at the shadow in the corner and you know without asking that you're in the body of a madman. This is Estigma. I'd like to give a bit of background for those of you that have not experienced it yet. Estigma is a difficult-to-play, difficult-to-master puzzle that simulates the state of wakeful insanity, where a person has been for all intents and purposes, dead for the better part of a day or so. This process is known as "Estigation". This process has been done to you and you must unravel the truth from within the atrocities and torments inflicted on your body and mind. The plot is a simple one. You're the shell of a person named Alex. He woke up in a strange

room and nobody will tell him why he's there. As an Estigmatic sort of person you have to solve the mystery of who and what he is before he loses his mind completely. It's up to you how you get him out of that terrible place and back to the world where he lives. It's your job to do everything in your power to help him work through all the horrors he has been put through in the past 24 hours. What's really interesting is that you, the player, are the chosen
