Layer Basics Every Photoshop document has a default _layer group_ (a set of basic tools and functions) that Photoshop uses to perform actions. While you don't have to use this default set, it does come in handy. It's also your first port of call when you start editing a file. The _layer group_ includes the following tools and functions: * Adjustments. These tools enable you to correct the whites, black, and other color in an image. They are listed in the order in which you would use them to fix the white balance, exposure, color, contrast, and the like. * Adjustments panel. This panel appears in the menu bar under the layers thumbnail. You can edit the settings for white balance, exposure, color, and so on, directly from this panel. * Adjustment histogram. This small, lower-left corner meter displays a histogram that shows the distribution of colors in your image. The histogram points to a brightness range on either side of the center. The brighter the curve, the brighter

Photoshop can be intimidating and confusing. Some professionals use it, but many people never learn how to use it properly. If you want to learn how to use Photoshop, here are 10 of the best lessons you can learn. 1. The 20 Most Popular Photoshop Tips Every day people ask me questions about Photoshop. So I put together a list of the 20 most popular Photoshop tips that have been requested. Enjoy! How do I delete a layer? Deleting layers is one of the most common requests. It's easy to remove and add any layer. Photoshop Elements is kind of a beginner's version of Photoshop, so it doesn't have many features to work with. If you want to remove a layer, you'll have to delete it. Fortunately, it's easy. To remove a layer, select Layer > Unlock Layers or press Shift + Ctrl + U. Now you can select the layer you want to delete. Hold down Shift and click on the layer. The layer will display a cross in its upper-right corner. Click once in the cross to delete the layer. To add a layer, select Layer > Lock Layers or press Shift + Ctrl + L. Now you can select the layer you want to add. You'll need to hold down Shift and click on the layer. The layer will display a plus sign in its upper-right corner. Click once on the plus sign to add the layer. How do I create a layer mask? Photo Editor It's important that you learn how to create layer masks. This is one of the most important skills you can learn in Photoshop. If you don't know how to create a layer mask, you can never get the most out of Photoshop. You may want to learn how to use Photoshop layers, but learning to make layer masks will help your work flow a lot more. Create a new file by choosing File > New. Open an image you wish to mask and name it something similar, such as image.jpg. How do I create a selection? To make a selection in Photoshop, you'll need to click on the Selection tool. You'll also need to click on the image and hold down Shift while clicking. It's important to remember that you'll need to hold Shift down while clicking, because if

Q: How do you define the bond dimensionality of a tensor? The definition of tensor refers to a tensor product of vectors. However, I cannot understand how one can define the bond dimensionality of a tensor T. To compute T, I start with a vector $\mathbf{x}$. Now, the product of a vector with the identity matrix yields another vector. In the same way, the product of $\mathbf{x}$ with another matrix will yield another vector. After repeating this process for all the matrices, I get a multi-indexed vector $\mathbf{y}$ ($\mathbf{x}^{\alpha_1} \cdots \mathbf{x}^{\alpha_n}$). Now, I have a tensor T corresponding to my initial vector $\mathbf{x}$ (where the elements of T are $\mathbf{y}$). I want to define the bond dimensionality n. How do I define the above in a rigorous way? A: You are trying to define the bond dimension of a tensor σ, i.e., the minimal m such that $$\sum_{\alpha_1}^m \dots \sum_{\alpha_m}^m \sigma_{\alpha_1,\dots,\alpha_m} = 1.$$ You have to define the corresponding quantity for a matrix (with elements τ_{ij}), which you might want to call $\dim(\tau)$. For a matrix M, the sum $\sum_{i,j} M_{ij}$ is 1 only if every row has exactly one nonzero entry, i.e., the matrix is full rank. For a tensor σ, the sum $\sum_{\alpha_1}^m \dots \sum_{\alpha_m}^m \sigma_{\alpha_1,\dots,\alpha_m}$ is 1 only if the matrix $\sigma^{T_1,\dots,T_n}$ is full rank (i.e., full column rank), where T_k denotes the kth dual index, i.e., $T_k = (\alpha\_$

Q: Hide specific ActiveRecord records when using an index? I'm using Ruby/Rails, ActiveRecord, and the index method to display different types of records at once. I have some records that contain private information, and I want to display them publicly in the index, while keeping them private in the get and show methods. Is there a way to do this with indexes? I know I can set the accessible attribute to false, but I'm interested if there's a solution for this. Here is an example: a = Something.index(:query, :name => 'Hello', :sort => :asc, :access => false) a.first a.first.title A: You could do something like this: a = Something.index(:query, :name => 'Hello', :sort => :asc, :access => false) a.each do |s| if s.private? puts s.title end end Whether this is more readable and maintainable than changing the public/private status of records from the model is a different question. Conspiracy to defraud the United States. Now is the time for you to expose those who brought you, the good German people, from our beloved homeland. A citizen of Germany had the nerve to join the Navy in 1973. His name: Richard Brown. It's very simple. We are not a large country. Even when we were a large country, we were not considered a large country. So we have no capacity to fight and win one bloody war. What kind of fools, what kind of idiots, what kind of lunatics put our most precious and valuable resource in the hands of a bunch of buffoons? Why? Why are we sending our best and most spirited citizens to fight and die in a lost war in the Middle East? Why are we sending food, toys, money to a barbaric, barbaric people?Mockingbird leads pre-emptive attack on DeSoto mayor By Curtis Tate The Mockingbird said one thing: the city of DeSoto cannot afford to fire Steven Ferguson. As Ferguson sat at a long table in a downtown DeSoto courtroom, wearing a black suit and a white dress shirt, the Mockingbird stepped up and
