
Iw3sp.exe 64 Bit Download !!INSTALL!!

Starting iw3sp.exe fails and reports the error: iw3sp.exe has stopped . OS Microsoft Windows 7 64-bit Intel Core i5 CPU 750 2.79GHz RAM 6GB Win 7 64bit I just installed Visual Studio 2012 and installed .NET Framework 4.5.1 and I think that might be the reason as I got this issue after installation. I have tried several suggestions on the internet but I am still getting the error. I also tried uninstalling and reinstalling the .NET Framework but there was no effect. I even tried deleting the winsxs folder, but with no luck because I can log in using an administrator account.
