Prowl Web: prowl.app
Prowl is a free and secure Instant Messaging application that is cross platform. It has all the features you would expect of a modern instant messenger like file transfer, voice call and video chat. How it works? Prowl is based on a secure connection which uses encryption. This means that even though your connection is not secure, Prowl does not give away any of your information. You can connect with friends or use Prowl for business. There are no credit cards, passwords, or any personal details required to use Prowl.
Pros: It is the only Instant Messaging program that allows you to transfer files, send voice and video calls, and share your desktop with your friends. The free version has all the features you would expect. You can download all kinds of emoticons, as well as the voice and video chat capabilities. The paid version has other useful features like Audio and video call and background wallpaper sharing. The company is actively improving the Prowl app, so you should not be worried about the use of it.
Cons: The paid version is quite expensive. The paid version is not free anymore. You can get all the emoticons in the free version only.

What's New In ApexDC ?

ApexDC++ is an alternative to StrongDC++. This peer-to-peer software is a direct connect (DC) file

sharing application that is made in a combination of Java and C++. ApexDC++ is capable of using the network connection of your computer and connect it to other DC networks. Key Features: 'Full DC': P2P connectivity mode makes this application operate as a peer-to-peer file sharing software. The main concept is to directly connect two computers and share files or folders. 'Fast Speed': The fastest DC file sharing application available. The software can transfer data directly on your computer network connection. 'Privacy': Provides a wide range of protection for all users. User specific encryption is one of the key features of this software. 'Multi-user': It is possible to share files with more than one person using this software. User specific authentication ensures that the transferred files are kept safe. What's new in version 1.5.0: Small changes have been made to the text messages. Its architecture makes it possible to share files in Direct Connect networks via two protocols, namely NDMC and ADC. 2 While most people resort to torrent clients as a way to download and upload data, it has quickly developed a fan-base due to the fact that it is simpler to use and relies on a different type of sharing algorithm, considerably more advantageous in terms of transfer speeds. 3 Straightforward installation and familiar GUI While the installation process is not time consuming, during deployment, the app offers you the possibility to install some additional components which are either fun (emoticons) or functional (GeoIP Database). Selecting these options is recommendable if you want to test the software to its fullest. It's interface does not make an impression on users that are accustomed to DC clients. The GUI is typical for this particular type of software, but nonetheless, there is some comfort in working with a familiar environment. Encrypt items and use a segment download feature A lot of users have switched from other software to this utility for various reasons - speed and overall performance, the vast and helpful community, constant updates, and many others. One of its most appreciated features is the segment downloading, which allows users to download a file from multiple
